There is one Teacher's Guide which corresponds with each Student Activities Book, and consists of two parts: Answers and Instructional Aids for Teachers, and Answer Sheets. The Answers and Instructional Aids for Teachers provides advice for how to optimize the effectiveness of the activities, as well as brief explanations and comments on each question in the student activities. The Answer Sheets may be duplicated and distributed to students as desired. Use of the Answer Sheets is particularly recommended for activities requiring a lot of graphing

they need to begin building successful active learning environments in their classrooms. Active Learning in Secondary and College Science Classrooms: A Working Model for Helping the Learner to Learn is motivated by fundamental changes in education in response to perceptions that students are not adequately acquiring the knowledge and skills necessary to meet current educational and economic goals. The premise of this book is that active learning offers a highly effective approach to meeting the mandate for increased student knowledge, skills, and performance. It
