The right question can provide for us not only the answer we need right then but also the ones we'll need tomorrow. Emmy award-winning journalist and media expert Frank Sesno wants to teach you how to question others in a methodical, intentional way so that you can find the same success that others have found by mastering this simple skill. In *Ask More*, you will learn: How the Gates Foundation used strategic questions to plan its battle against malaria How turnaround expert Steve Miller uses diagnostic questions to get to the heart of a company's problems How creative questions animated a couple of techie dreamers to brainstorm Uber How journalist Anderson Cooper uses confrontational questions to hold people accountable Throughout *Ask More*, you'll explore all different types of inquiries--from questions that cement relationships, to those that will help you plan for the future. By the end, you'll know what to ask and when, what you should listen for, and what you can expect as the outcome.

"The former federal prosecutor and congressman for South Carolina breaks down the art of persuasion into a few shockingly simple, easy-to-follow, and proven steps that will help readers win arguments, gain support for their cause, and convey their message successfully. You may never find yourself in front of jury during a criminal prosecution arguing for a particular verdict or offering yourself for elected office in a political campaign. You simply want to be heard. You want to be understood. You want to effectively communicate what you believe, why you believe it, and perhaps why others should adopt your position as well. This book will help you get better at advancing what you believe through the art of asking the right questions, at the right time, in the right order, and in the right form. Blending gripping case studies, relatable personal stories, digestible evidence, and practical advice, it walks you through the tools and the mindset needed to effectively communicate. Using the same techniques he used from the courtroom to Congress, Trey Gowdy helps you land on your objective, know your jury, establish your burden of proof, and formulate strategic questions to persuade effectively beyond a reasonable doubt. The art of asking the right questions, listening to the response, and following up in a systematic way is essential to moving hearts and minds. And that should always be our objective when it comes to persuasion: striving not only to communicate but to move our audience to action. So let's get moving!"--

However once you take control of your questioning, you will also be better able to answer questions effectively and without embarrassment. Questions are not just about remembering the facts you have been taught. Good questions can be open-ended and guide students and employees into a better understanding and more creativity. Rhetorical questions are not meant to be answered, and yet they are powerful to engage your listeners during a presentation or talk. And don't forget the questions that you should be asking yourself. This book includes a list of fifty powerful questions that you can work through asking yourself to improve your thinking and your relationships. When you have finished reading, go through the exercises and the questions to see if you have understood. And then read it again and try it out in your own life.
