The Yamaha IT 465 was a Two stroke, single cylinder, reed valve, air cooled Enduro motorcycle produced by Yamaha between 1981 and 1983. Max torque was 30.98 ft/lbs (42.0 Nm) @ 5500 RPM. Claimed horsepower was 35.0 HP (26.1 KW) @ 6000 RPM.

~~Yamaha IT465: history, specs, pictures - CycleChaos~~

Full of cutting edge tech for the time, such as the rear monoshock, the IT465 is revered by many as the best of the IT (International Trial) bikes that Yamaha ever made. Though Yamaha would eventually made a 490 cc version of this bike, many felt that the bigger bore required to make more power wasn't worth the trade-off of a slightly sluggish start off the line. Even today, the 465 feels ...

professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

In the early 1800s, Robert Owen was a mill owner, political figure, and an advocate for social reform, and his publications attained considerable circulation. He believed that people need good working conditions in order to be encouraged to work and motivated to learn. Despite the higher costs associated with this kind of operation, compared to the traditional ones, Owen's management resulted in increased productivity and profit. His results caught the attention of men of wealth who were interested in social reform. In particular, at a similar time, Jeremy Bentham was developing his own theories. Owen and Bentham seemed to be based on some similar ideas that the greatest happiness creates the greatest results. Their ideas developed against the backdrop of the Industrial Revolution, and growing social and economic problems in England. Owen and Bentham were forerunners of highly relevant current theories of economics – marginalism, entrepreneurship, personnel management, and constructivism. They were acquainted with such important authors as James Mill, Malthus, Ricardo and John Stuart Mill. However, their economic theories were ruled out by classical economists, who actively tried to silence perspectives different from the orthodoxy. This book presents an innovative study of these two social thinkers and reformers, who have rarely, if ever, been studied together. This comparative study provides new context both on the social debate taking place during the Industrial Revolution, and on the development of modern social thought, in particular, the relationship between socialism and utilitarianism. Economics, Entrepreneurship and Utopia will be of great relevance to scholars with an interest in the history of economic ideas, the history of entrepreneurship, and social reform in both historical and contemporary contexts.

Summary: "This book provides a fascinating insight to the vibrant street style of the "Sapeurs", the elegant and immaculately dressed dandies from the heart of the Congo. The Sapeurs today belong to 'Le SAPE' (Societe des Ambianceurs et des Personnes Élégentes, or the Society of Tastemakers and Elegant people) - one of the world's most exclusive clubs. Members have their own code of honour, codes of professional conduct and strict notions of morality. It is a world within a world within a city. Designer brands of suits and accessories are of the utmost importance to Sapeurs - Pierre Cardin, Roberto Cavalli, Dior, Fendi, Gaultier, Gucci, Issey Miyake, Prada, Yves Saint Laurent, Versace, Yohji Yamamoto - are their patron saints. Unlike some US hip-hop gangs who are dressed in similar fine threads, there is no bloodshed here - here your clothes do all the fighting for you, otherwise you are not fit to be called a Sapeur. The result is a unique and inspiring style, that has captured the imagination of people all over the world - the sapeurs are now truly the kings of elegance"-- Publisher's web site.

100 year anniversary celebration of the Harley Davidson motorcycle company.

A Veloce Classic Reprint. Tales of Triumph Motorcycles and the Meriden Factory is a delightful and often humorous account of life with the Triumph motorcycle company in its heyday. Hughie Hancox started work with the Triumph Engineering Company (manufacturer of Triumph motorcycles) in 1954 and, apart from a short break for national service, stayed with the company until it closed in 1974. In his time with Triumph, Hughie worked in the Experimental, Service, Product Road Test, Toolroom, Final Production Assembly and Service Repair Shop departments before joining the staff in the Service Office. He also served as a Technical Writer/Advisor/Customer Relations "Trouble Shooter." Even his National Service was spent with the "White Helmets" motorcycle display team! Here, Hughie tells the story of his life in the famous Meriden factory and of his many adventures with Triumph motorcycles and Triumph people and, by doing so, records the fascinating inside story of one of Britain's greatest motorcycle marques.
