Europe On 5 Wrong Turns
Europe on 5 Wrong Turns a Day is a well-written travel diary. It's atypical - and that's good. Too many pieces of traveling writing dive into rare, unseen, poor places and laud at how great life is there despite obvious economic short-comings. This book bucks that trend - it examines the places people would actually travel.

Prepare to Get Lost on the Beaten Path... When Doug Mack picked up a 1963 edition of Europe on Five Dollars a Day, he stumbled on an inspired idea: to boldly go where millions have gone before, relying only on the advice of a travel guide that's nearly a half century out-of-date. Add to the mix his mother's much- documented grand tour through Europe in the late 1960s, and the result is a funny and fascinating journey into a new (old) world, and a disarming look at the ways the classic tourist experience has changed- and has not- in the last generation. After a whirlwind adventure spanning eight countries-and costing way more than five dollars a day-Mack's endearing account is part time travel, part paean to Arthur Frommer's much-loved guide, and a celebration of the modern traveler's grand (and not-so-grand) tour.

This book collects innovative research presented at the 17th Conference of the Association of Geographic Information Laboratories for Europe (AGILE) on Geographic Information Science, held in 2014 in Castell ó n, Spain. The scientific papers cover a variety of fundamental research topics as well as applied research in Geospatial Information Science, including measuring spatiotemporal phenomena, crowdsourcing and VGI, geosensor networks, indoor navigation, spatiotemporal analysis, modeling and visualization, spatiotemporal decision support, digital earth and spatial information infrastructures. The book is intended for researchers, practitioners, and students working in various fields and disciplines related to Geospatial Information Science and technology.

Is it possible to travel all the way around the world using nothing but a bicycle on land and boats on water?When Chris Pountney pedals away from the Eiffel Tower he is doing more than just going for a bike ride. It is the start of an ambitious attempt to circumnavigate the planet using only his bicycle and boats. With a list of seven challenges to guide him (but no map), he heads east towards Asia and Australia. The Sydney Opera House is his goal.The story follows Chris as he tackles snowy mountain passes in Turkey, wades across rivers in Tajikistan, eats strange chesses in Mongolia, and meets with incredible kindness just about everywhere he goes. He lives a simple life on a small budget, sleeps in a tent, talks to his bike, consumes a really unbelievable number of biscuits, and all the time stubbornly refuses to have anything whatsoever to do with motor vehicles (or escalators). But can he overcome all of the visa deadlines, the breakdowns, the awful roads, the headwinds, the kangaroos, and the frequent danger of being distracted by members of the opposite sex, to successfully pedal all of the way to Sydney?

Half a millennium of European warfare brilliantly retold by masterly historian Brendan Simms At the heart of Europe's history lies a puzzle. In most of the world humankind has created enormous political frameworks, whether ancient (such as China) or modern (such as the United States). Sprawling empires, kingdoms or republics appear to be the norm. By contrast Europe has remained stubbornly chaotic and fractured into often amazingly tiny pieces, with each serious attempt to unify the continent (by Charles V, Napoleon and Hitler) thwarted. In this marvelously ambitious and exciting new book, Brendan Simms tells the story of Europe's constantly shifting geopolitics and the peculiar circumstances that have made it both so impossible to dominate, but also so dynamic and ferocious. It is the story of a group of highly competitive and mutually suspicious dynasties, but also of a continent uniquely prone to interference from 'semi-detached' elements, such as Russia, the Ottoman Empire, Britain and (just as centrally to Simms' argument) the United States. Europe: The Struggle for Supremacy will become the standard work on this crucial subject - and an extremely enjoyable one. Reviews: This is a brilliant and beautifully written history. From the Holy Roman Empire to the Euro, Brendan Simms shows that one of the constant preoccupations of Europeans has always been the geography, the power and the needs of Germany. Europe is a work of extraordinary scholarship delivered with the lightest of touches. It will be essential, absorbing reading for anyone trying to understand both the past and the present of one of the most productive and most dangerous continents on earth' William Shawcross 'World history is German history, and German history is world history.This is the powerful case made by this gifted historian of Europe, whose expansive erudition revises the proud tradition of the history of geopolitics, and whose imminent moral sensibility reminds us that human choices made in Berlin (and London) today about the future of Europe might be decisive for the future of the world' Timothy Snyder (author of Bloodlands) About the author: Brendan Simms is Professor of the History of International Relations at the University of Cambridge. His major books include Unfinest Hour: Britain and the Destruction of Bosnia (shortlisted for the Samuel Johnson Prize) and Three Victories and a Defeat: The Rise and Fall of the First British Empire.

The Strange Death of Europe is the internationally bestselling account of a continent and a culture caught in the act of suicide, now updated with new material taking in developments since it was first published to huge acclaim. These include rapid changes in the dynamics of global politics, world leadership and terror attacks across Europe. Douglas Murray travels across Europe to examine first-hand how mass immigration, cultivated self-distrust and delusion have contributed to a continent in the grips of its own demise. From the shores of Lampedusa to migrant camps in Greece, from Cologne to London, he looks critically at the factors that have come together to make Europeans unable to argue for themselves and incapable of resisting their alteration as a society. Murray's "tremendous and shattering" book (The Times) addresses the disappointing failures of multiculturalism, Angela Merkel's U-turn on migration, the lack of repentiation and the Western fixation on guilt, uncovering the malaise at the very heart of the European culture. His conclusion is bleak, but the predictions not irrevocable. As Murray argues, this may be our last chance to change the outcome, before it's too late.

" To truly understand the United States, one must understand The Not-Quite States of America. " —Mark Stein, best-selling author of How the States Got Their Shapes Everyone knows that America is 50 states and... some other stuff. The U.S. territories—American Samoa, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands—and their 4 million people are little known and often forgotten, so Doug Mack set out on a 30,000-mile journey to learn about them. How did they come to be part of the United States? What are they like today? And why aren ' t they states? Deeply researched and richly reported, The Not-Quite States of America is an entertaining and unprecedented account of the territories ' crucial yet overlooked place in the American story.

Ranging from influence over world trade laws affecting health to population health issues such as obesity to the use of comparative data to affect policy, the EU's public health policies are increasingly important, visible, expensive and effective. They also provide an invaluable case study for those who want to understand the growth and impact of the EU as well as how states can affect their populations' lives and health. European Union Public Health Policy capitalizes on extensive new research, providing an introduction to the topic and indicating new intellectual directions surrounding the topic. An introductory section and extended conclusion explore the meaning of public health, the relationship of EU public health policy to health care policy, and the place of public health in the study of European integration and Europeanization. Focusing on health system transformation, global health governance and population health, the chapters address: Relevant policy issues and EU policies; Effects of the EU policies on practice or outcomes; An explanation of the policy trajectory; Current issues and likely future directions or conflicts. Drawing together an international and multidisciplinary selection of experts, this volume is an important contribution for all those interested in public health policy, EU health policy and EU governance.

From the bestselling author of The Sex Lives of Cannibals, the laugh-out-loud true story of his years on the islands of Vanuatu and Fiji, among cannibals, volcanoes . . . and the world ' s best narcotics. With The Sex Lives of Cannibals, Maarten Troost established himself as one of the most engaging and original travel writers around. Getting Stoned with Savages again reveals his wry wit and infectious joy of discovery in a side-splittingly funny account of life in the farthest reaches of the world.

After two grueling years on the island of Tarawa, battling feral dogs, machete-wielding neighbors, and a lack of beer on a daily basis, Maarten Troost was in no hurry to return to the South Pacific. But as time went on, he realized he felt remarkably out of place among the trappings of a twenty-first-century America. When he found himself holding down a job—one that might possibly lead to a career—he knew it was time for he and his wife, Sylvia, to repack their bags and set off for parts unknown. Getting Stoned with Savages tells the hilarious story of Troost ' s time on Vanuatu—a rugged cluster of islands where the natives gorge themselves on kava and are still known to " eat the man. " Falling into one amusing misadventure after another, Troost struggles against typhoons, earthquakes, and giant centipedes and soon finds himself swept up in the laid-back, clothing-optional lifestyle of the islanders. When Sylvia gets pregnant, they decamp for slightly-more-civilized Fiji, a fallen paradise where the local chiefs can be found watching rugby in the house next door. And as they contended with new parenthood in a country rife with prostitutes and government coups, their son begins to take quite naturally to island living—in complete contrast to his dad.
