#14) From Projects To Programs A

One definition of a program is a temporary organization created to coordinate, direct the work, and supervise the delivery of a number of related projects that all contribute to a particular outcome. A project, on the other hand, is a temporary organization designed to deliver a particular output.

What's the Difference Between Projects & Programs ...

A project represents a single, focused endeavour. A program is a collection of projects – together all the projects form a connected package of work. The different projects complement each other to assist the program in achieving its overall objectives.

The Difference Between a Project and a Program | APMG ...

While most programs are likely to be larger, more complex, and less certain than most projects, the key differentiator between a program and a project is, as described earlier, their objective. Programs are focused on realizing benefits; projects are focused on delivering defined outputs. One of the major roles of a program manager is to initiate projects to create the outputs the program ...
