Mechanical Ventilation And  
Intensive Respiratory  
airway pressure which “triggers” the  
ventilator to deliver the set TV. Always  
the “Set”. TV.

*An Intern's Guide to Ventilators*

Normal inspiration generates negative intrapleural pressure, which creates a pressure gradient between the

# Access Free Guide To Mechanical Ventilation And

Intensive Respiratory  
atmosphere and the alveoli, resulting in air inflow. In mechanical ventilation, the pressure gradient results from increased (positive) pressure of the air source. Peak airway pressure is measured at the airway opening ( $P_{ao}$ ) and is routinely displayed by mechanical ventilators.
