Text book for students of Years 10 to 12 Information Technology. Also appropriate for use in Commerce and Business Mathematics courses. No prior knowledge of spreadsheets is required and students can work through the instructions at their own pace. The basic concepts of a spreadsheet are introduced before business applications are explored. Students are guided as to how to plan, format and complete each spreadsheet. Each chapter includes an introduction, exercises, and an assignment. The software used is Microsoft Excel 5.0 using either an IBM compatible 486 running Windows, or a Macintosh system. An answer booklet and data disk providing graphics used and a number of prepared spreadsheets accompanies this text. One of the 'Guided Computer Activities' series, each title dealing with a particular software package.
