This book analyses emerging constitutional principles addressing the regulation of the internet at both the national and the supranational level. These principles have arisen from cases involving the protection of fundamental rights. This is the reason why the book explores the topic through the lens of constitutional adjudication, developing an analysis of Courts' argumentation. The volume examines the gradual consolidation of a "constitutional core" of internet law at the supranational level. It addresses the European Court of Human Rights and the Court of Justice of the European Union case law, before going on to explore Constitutional or Supreme Courts' decisions in individual jurisdictions in Europe and the US. The contributions to the volume discuss the possibility of the "constitutionalization" of internet law, calling into question the thesis of the so-called anarchic nature of the internet.

This text provides coverage of the private international aspects of Internet-related law. It addresses the

Aereo and FilmOn X stream television programming over the Internet for a monthly subscription fee. Aereo and FilmOn's technology permits subscribers to watch both live broadcast television in addition to already-aired programming. Their use of this development in technology has triggered multiple lawsuits from broadcasting companies alleging copyright violations. These cases reveal not only multiple interpretations of copyright law and its application to new and developing technologies but also a possible "loophole" in the law, which some have accused Aereo and FilmOn of exploiting. This book discusses internet television streaming and copyright laws. It then discusses remote-storage digital video recorders and the copyright laws that go along with it.

This classic collection of carefully selected and edited Supreme Court case excerpts and comprehensive background essays explores constitutional law and the role of the Supreme Court in its development and interpretation. Well-grounded in both theory and politics, it displays the role of the U.S. Supreme Court as a legal AND political institution and as a major player in American government. It includes instructions for Reading a Supreme Court Decision. Using explanations and examples, walks readers through the task of briefing (making a detailed outline of) and understanding a case. Updates all essays and cases to reflect recent developments and decisions by the Supreme Court -- especially from the 1996-1997 Term -- during which the Court rearranged more constitutional furniture than usual. Expands the essay on Freedom of Expression to consider constitutional issues facing the electronic media (including the Internet). Features 9 new cases -- all decided by the Supreme Court since 1995 . Demonstrates the political significance of the cases that the Court decides by connecting them with what appears to be at stake when the President fills a vacancy on the Court. Features relevant extra-judicial material that highlight conflict among political and judicial actors over the proper role for the Supreme Court in American government.

In *Google v. Spain*, the Court of Justice of the European Union extended the fundamental right for privacy protection, concluding that search companies, in some circumstances, could be required to remove links to private facts. The decision provoked widespread discussion but one of the key voices was often not present. "The Right to be Forgotten on the Internet: *Google v. Spain*," authored by the former Spanish Data Protection Commissioner and now available in English for the first time, charts the history of the case and describes the key arguments underlying this landmark decision. Artemi Rallo details the earlier disputes before the Spanish Data Protection Agency, the *Google v. Spain* decision itself, European scholarship and related legislation, as well as significant precedents from European, American, and international courts. Rallo, who is also a Constitutional law professor, provides a thoughtful, detailed account of one of the most significant privacy cases of the modern age.
