request the resources needed to run jobs. The document also contains a chapter that describes "started tasks" and how to set them up.

IBM z/OS MVS JCL Reference (SA23-1385-30)

Job control language (JCL) is a set of statements that you code to tell the z/OS® operating system about the work you want it to perform. Although this set of statements is quite large, most jobs can be run using a very small subset. Learn about essential and most frequently used JCL statements and parameters, as well as coding techniques.
