This book explains what made Alexander 'Great' according to the people and expectations of his time and place.

Britta Lindquist left Sitka six years ago in an attempt to distance herself from the love of her life, Yuri Belikov. Upon her return, she finds Yuri absent and his wife about to deliver a child. When tragic circumstances ensue, Britta suddenly finds herself caring for Yuri's children--and her life intertwining with the man she's tried so hard to forget. But Britta's other great love is for the violin, and her talent is recognized by Brenton Maltese, a conductor from England. He proposes she accept the coveted first chair position in his orchestra...and also his hand in marriage. At a crossroads, Britta must determine what her heart truly longs for--and if she's willing to fight for it.

Clinical Drug Therapy for Canadian Practice, Second Edition provides unique coverage of nursing interventions for drug therapy, explaining the "why" behind each nursing action and emphasizing how drugs work differently in different patients. This edition incorporates a dynamic, full-color design and art program, key terms, CRNE questions, and more Canadian references and research.

Newly widowed Lydia Sellers discovers that through an unforeseen fluke, she is the sole recipient of her husband's fortune. But instead of granting her security, it only causes strife as her adult stepchildren battle to regain the inheritance for themselves. Lydia, longing to put the memories of her painful marriage behind her, determines to travel to Alaska to join her aunt. Lydia's arrival in Sitka, however, brings two things she didn't expect. One is the acquaintance of Kjell Bjorklund, the handsome owner of the sawmill. Second is the discovery that she is pregnant with her dead husband's child. What will this mean for her budding relationship with Kjell? And what lengths will her stepchildren go to reclaim their father's fortune? Lydia soon finds her life--and that of her child's--on the line.

You know what happens when bad boys get what they wish for? Everything. . . New York Times Bestselling Author Lori Foster Playing Doctor Attitude makes a huge difference in bed. It could be Axel Dean's motto. The sexy physician likes his women with sensual moxie, and Libby Preston definitely seems to fit that bill. There's that naughty grin. That hot bod. Her eager kisses and cheeky insults. Her. . .admitted virginity. Whoa. Okay, cue cold shower. Axel may not be an honorable man, but he has his limits. Except Libby won't take no for an answer. She's determined to have someone show her what she's been missing, and suddenly, Axel can't bear to think of Libby playing doctor with anyone else. . . USA Today Bestselling Author Erin McCarthy The Lady of the Lake Pro baseball player Dylan Diaz is pretty sure he's going to hell. When you rescue a drowning woman from a lake your first thought should be, "Are you okay?" not, "Can I make mad, passionate love to you?" But the minute sputtering kindergarten teacher Violet Caruthers is on Dylan's boat, that's all he can think about. Maybe it's the potent combo of a nun's personality inside a stripper's body. Maybe it's the way she drives him crazy with desire and laughter. Or maybe, Dylan's finally found what's been missing in his life, and he's not about to let go. . .

Dalton Lindquist is forced to make difficult choices about the future when dark family secrets threaten the tranquility of his life, and to complicate matters, Dalton and his best friend, Yuri, seek the attention of the same woman, Phoebe Robbins.

Based on the successful Baby Owner's Manual, The Baby Owner's Maintenance Log presents a refreshing alternative to traditional sugar-sweet baby journals. Hip parents can record all major milestones and measurements in these pages, including the arrival of the unit, fuel preferences and speech activation. Spiral binding, hilarious illustrations and a bound-in envelope for keepsakes make this guided journal a great shower gift.

Schizophrenia remains the most complex, puzzling, and because of its tendency towards chronicity, the most severe of the mental disorders. It is a very heterogeneous disorder characterized by extreme disruptions of thought, perception, behavior, and emotion. About 1 % of the population worldwide will experience at least one schizophrenic episode. Most of the patients will have a number of exacerbations leading in about 30% of cases to a chronic residual state, due either to the illness itself or to psychosocial environmental factors, or-most likely-to the interaction of both. Given the enormous personal hardship for patients and their relatives as well as the staggering costs of the illness for our societies, research in schizo phrenia has become the number one priority in many countries, especially in the United States. However, research on the etiology of schizophrenia has failed to establish a single causal factor, and it is nowadays accepted to be multifactorial. A combination of biological predisposition and environmental circumstances is assumed to be necessary for the manifestation of the illness. This shift in orientation away from an either/or (biological or environmental, e.g., family interaction) point of view, as evident in the work of the 1950s and 1960s, was certainly desirable to encourage research.
