At age seven, Anna watched her mother walk into the surf and drown, but nine years later, when she moves with her father to the beach where her parents fell in love, she joins the cross-country team, makes new friends, and faces her guilt.

This series of comprehensive manuals gives the home mechanic an in-depth look at specific areas of auto repair.

2003-2006 HONDA CBR600RR

Alan Seeley. Following on from the success of The Motorcycle Book, this extensively illustrated, all-color book provides comprehensive reference for all scooter owners and enthusiasts. From traditional to sports, through big-wheel and Super, all aspects of buying, riding, maintaining and tuning a scooter are included. Whether a beginner or experienced rider, the reader will find all the information they need to get on the road and stay on the road safely. There are detailed sections on how a scooter works and how to keep it running, with extensive maintenance and trouble-shooting chapters.

Yamaha YZF-R1 1998-2003

Anyone can recycle a plastic bottle by tossing it into a bin, but it takes a bit of skill to propel it into that bin from 500 feet away. Skill, and a copy of Soda-Pop Rockets. Author and engineer Paul Jarvis has designed 20 different easy-to-launch rockets that can be built from discarded plastic drink bottles. After learning how to construct and fly a basic model, readers will find out new ways to modify and improve their designs, including built-on fins, nosecones, and parachutes that enable a rocket to float safely back to earth. More complex designs include two-, three-, and five-bottle rockets, gliding rockets, long-tail rockets, cluster rockets, whistling rockets, ring-finned rockets, and a jumbo version made from a five-gallon water-cooler tank. Clear, step-by-step instructions with full-color illustrations accompany each project, including how to build a launch pad, along with photographs of the author firing his creations into the sky. For those determined to find an educational benefit to their tinkering, these rockets are a clear demonstration of Newton's Third Law. Soda-bottle rockets can even be used as science fair projects by budding engineers. You don't have to be a rocket scientist to build them, but who knows what career path you'll take after you do?

JavaScript is one of the easiest, most straightforward ways to enhance a website with interactivity. Sams Teach Yourself JavaScript in 24 Hours, 4th Edition serves as an easy-to-understand tutorial on both scripting basics and JavaScript itself. The book is written in a clear and personable style with an extensive use of practical, complete examples. It also includes material on the latest developments in JavaScript and web scripting. You will learn how to use JavaScript to enhance web pages with interactive forms, objects, and cookies, as well as how to use JavaScript to work with games, animation, and multimedia.

Demonstrates how to get connected to the Internet, send and receive e-mail, shop online, track finances, create a Web site, and install filtering software

The Italian art cinema of the 1960s is known worldwide for its brilliance and vitality. Yet rarely has this cinema been considered in relation to the profound economic and cultural changes that transformed Italy during the sixties--described as the "economic miracle." Angelo Restivo argues for a completely new understanding of that cinema as a negotiation between a national aesthetic tradition of realism and a nascent postmodern image culture. Restivo studies numerous films of the period, focusing mainly on the works of Pier Paolo Pasolini and Michelangelo Antonioni. He finds that these auteurs' films reworked the neorealist aesthetic developed in the 1940s and 1950s, explored issues brought to the fore by the subsequent consumer boom, and presaged developments central to both critical theory and the visual arts in the 1980s and 1990s. Drawing on the theories of Lacan, Zizek, Benjamin, Foucault, Jameson, and Deleuze, he shines new light on such films as Pasolini's Accattone and Teorema, and Antonioni's Red Desert and Blow-Up. Restivo's model for understanding the relationship of the 1960s Italian art film to its cultural contexts also has implications that extend to the developing national cinemas of countries such as Brazil and Taiwan. The Cinema of Economic Miracles will interest scholars and students in all areas of film studies, especially those studying theories of the image, national cinema theory, and Italian cinema, and to those engaged in poststructuralist theory, philosophy, and comparative literature.

This lively textbook differs from others on the subject by its usefulness as a conceptual and mathematical preparation for the study of quantum mechanics, by its emphasis on a variety of learning tools aimed at fostering the student's self-awareness of learning, and by its frequent connections to current research.
