Making tangible connections between theory and practice, ideas and form, this book encourages debate about the artistic, conceptual, and cultural significance of the way things look. What are the metaphysical concepts at the heart of design

education, theory,
and philosophy?
Why do we assume
that design is
impossible to teach?
This book
challenges the
traditional
foundations of
perception and
takes an
imaginative, radical
approach, setting
itself apart from the

traditions of
analytical
philosophy,
evolutionary
psychology, and
phenomenology
which underpin
much of current
