This book constitutes the refereed proceedings of the 13th International Conference on Blended Learning, ICBL 2020, held in Bangkok, in August 2020. The 33 papers presented were carefully reviewed and selected from 70 submissions. The conference theme of ICBL 2020 is Blended Learning : Education in a Smart Learning Environment. The papers are organized in topical sections named: Blended Learning, Hybrid Learning, Online Learning, Enriched and Smart Learning, Learning Management System and Content and Instructional Design.

The U.S. Departments of Commerce and Education (who co-chair the NSTC Working Group) and NetDay formed a partnership aimed at analyzing K-12 student views about technology for learning. These views are analyzed in this second report, "Visions 2020.2: Student Views on Transforming Education and Training Through Advanced Technologies." In October-November 2004, NetDay sponsored its "Speak-Up Day for Students" which offered online questionnaires, which asked K-12 students across the country about their use of technology. More than 160,000 students participated in answering questions; 38 percent of these students were in grades K-6, and 62 percent were students in grades 6-12. "Visions 2020.2" begins with an exploration of how today's K-12 aged youth--the so-called New Millennials--use digital technologies. The analysis then explores four themes commonly touched on in the students' answers: (1) Digital Devices; (2) Access to Computers and the Internet; (3) Intelligent Tutor/Helper; and (4) Ways to Learn and Complete School Work Using Technology. Math and reading were often cited specifically as subjects that might benefit from the use of learning technologies. For each of the four themes, selected student answers to the NetDay question are included to add richness to the themes and to give voice to the student views. In addition, for each theme, excerpts from the U.S. Department of Commerce publication "Visions 2020: Transforming Education and Training Though Advanced Technologies" are included. These vignettes envision the use of advanced technologies for learning in ways that are similar to those suggested by the students. (Contains 10 footnotes.).

Based on twenty case studies of universities worldwide, and on a survey administered to leaders in 101 universities, this open access book shows that, amidst the significant challenges caused by the COVID-19 pandemic, universities found ways to engage with schools to support them in sustaining educational opportunity. In doing so, they generated considerable innovation, which reinforced the integration of the research and outreach functions of the university. The evidence suggests that universities are indeed open systems, in interaction with their environment, able to discover changes that can influence them and to change in response to those changes. They are also able, in the success of their efforts to mitigate the educational impact of the pandemic, to create better futures, as the result of the innovations they can generate. This challenges the view of universities as "ivory towers" being isolated from the surrounding environment and detached from local problems. As they reached out to schools, universities not only generated clear and valuable innovations to sustain educational opportunity and to improve it, this process also contributed to transform internal university processes in ways that enhanced their own ability to deliver on the third mission of outreach.

The BEST prep book to help students ACE the HSPT Test! Successfully Used by Thousands of HSPT Test Takers HSPT Math Prep 2020 – 2021, which reflects the 2020 - 2021 test guidelines, is dedicated to preparing test takers to ace the HSPT Math Test. This comprehensive HSPT Math Prep book with hundreds of examples, abundant sample HSPT mathematics questions, and two full-length and realistic HSPT Math tests is all you will ever need to fully prepare for the HSPT Math. It will help you learn everything you need to ace the math section of the HSPT test. Effortless Math unique study program provides you with an in-depth focus on the math portion of the exam, helping you master the math skills that students find the most troublesome. This HSPT Math preparation book contains most common sample questions that are most likely to appear in the mathematics section of the HSPT. Inside the pages of this comprehensive HSPT Math book, students can learn basic math operations in a structured manner with a complete study program to help them understand essential math skills. It also has many exciting features, including: Content 100% aligned with the 2020 TASC test Written by HSPT Math instructors and test experts Complete coverage of all HSPT Math concepts and topics which you will be tested Over 2,500 additional HSPT math practice questions in both multiple-choice and grid-in formats with answers grouped by topic, so you can focus on your weak areas Abundant Math skill building exercises to help test-takers approach different question types that might be unfamiliar to them Exercises on different HSPT Math topics such as integers, percent, equations, polynomials, exponents and radicals 2 full-length practice tests (featuring new question types) with detailed answers HSPT Math Prep 2020 – 2021 is an incredibly useful resource for those who want to review all topics being covered on the HSPT test. It efficiently and effectively reinforces learning outcomes through engaging questions and repeated practice, helping you to quickly master Math skills. Visit www.EffortlessMath.com for Online Math Practice

This book constitutes selected, revised and extended papers from the 12th International Conference on Computer Supported Education, CSEDU 2020, held as a virtual event in May 2020. The 25 revised full papers were carefully reviewed and selected from 190 submissions. The presented papers contribute to the understanding of relevant trends of current research on Computer Supported Education, including learning analytics, intelligent tutoring systems, virtual and augmented reality, MOOCs, and automated assessment systems.

This two-volume set LNAI 12163 and 12164 constitutes the refereed proceedings of the 21th International Conference on Artificial Intelligence in Education, AIED 2020, held in Ifrane, Morocco, in July 2020.* The 49 full papers presented together with 66 short, 4 industry & innovation, 4 doctoral consortium, and 4 workshop papers were carefully reviewed and selected from 214 submissions. The conference provides opportunities for the cross-fertilization of approaches, techniques and ideas from the many fields that comprise AIED, including computer science, cognitive and learning sciences, education, game design, psychology, sociology, linguistics as well as many domain-specific areas. *The conference was held virtually due to the COVID-19 pandemic.

Student and novice researchers may have a general idea for a topic they would like to research, but have a difficult time settling on a more specific topic and its associated research questions. Addressing this problem, this book features contributions from over thirty diverse and experienced research supervisors, mentors, and principal investigators in the field of language teacher education. The chapters are autobiographic in nature, with each contributing author reflecting on relevant, current and innovative research topics through the lens of their own professional life and research work. Offering explicit research topics and strategies for each area of expertise, this book will serve as a useful reference for the seasoned qualitative or narrative researcher, and a helpful guide for new researchers and teacher researchers narrowing down their own research topics.

The two-volume set LNAI 13067 and 13068 constitutes the proceedings of the 20th Mexican International Conference on Artificial Intelligence, MICAI 2021, held in Mexico City, Mexico, in October 2021. The total of 58 papers presented in these two volumes was carefully reviewed and selected from 129 submissions. The first volume, Advances in Computational Intelligence, contains 30 papers structured into three sections: – Machine and Deep Learning – Image Processing and Pattern Recognition – Evolutionary and Metaheuristic Algorithms The second volume, Advances in Soft Computing, contains 28 papers structured into two sections: – Natural Language Processing – Intelligent Applications and Robotics

Online education, both by for-profit institutions and within traditional universities, has seen recent tremendous growth and appeal - but online education has many aspects that are not well understood. The SAGE Encyclopedia of Online Education provides a thorough and engaging reference on all aspects of this field, from the theoretical dimensions of teaching online to the technological aspects of implementing online courses—with a central focus on the effective education of students. Key topics explored through over 350 entries include: · Technology used in the online classroom · Institutions that have contributed to the growth of online education · Pedagogical basis and strategies of online education · Effectiveness and assessment · Different types of online education and best practices · The changing role of online education in the global education system
