Nursing Care Of Children Principles And Practice [PDF]

The principles describe what constitutes safe and effective nursing care, and cover the aspects of behaviour, attitude and approach that underpin good care. Each of the principles was developed by the Royal College of Nursing in partnership with the Department of Health and the Nursing and Midwifery Council. Patients, the public and health care staff were also involved in developing them. Learn more about how the principles are put into practice with this series of short films exploring each ...

Updated content reflects the changes in the Nursing Care of Children, 4th Edition textbook to keep you up to date.

This study provides supplemental learning activities and NCLEX review questions to reinforce comprehension of information covered in the text and prepare students for the exam.

Written for today's nurse, PRINCIPLES OF PEDIATRIC NURSING: CARING FOR CHILDREN, 5/e explores the conditions and nursing interventions for health conditions affecting children, adolescents and their families. Emphasizing research and evidence-based practice, it organizes material by body system instead of developmental stage, allowing faculty to teach pediatrics in integrated courses/short courses without redundancy. This edition includes a new chapter on genetic and genomic influences, more emphasis on culturally competent care, and new features that emphasize clinical reasoning and health promotion. Designed to help students bridge the gap between classroom and clinical situations, the book emphasizes health promotion and maintenance, growth and development, and family-centered care. 0133937410 / 9780133937411 Principles of Pediatric Nursing: Caring for Children Plus MyNursingLab with Pearson eText -- Access Card Package Package consists of: 0132111756 / 9780132111751 Principles of Pediatric Nursing: Caring for 0133930882 / 9780133930887 MyNursingLab with Pearson eText -- Access Card -- for Principles of Pediatric Nursing: Caring for Children

One CD-ROM disc in pocket.

This concise, student-friendly text is ideal for shorter courses in pediatric nursing. A focus on common and important disorders keeps the material relevant to daily practice. In this 2nd Edition, current issues and trends are addressed through the use of community nursing care plans, expanded health promotion content, and enhanced communication tips. · A highlighted Clinical Reference section opens each Alterations chapter, providing a review of the relevant body system, a discussion of pediatric differences, and a description of common diagnostic tests. · Pathophysiology boxes describe how disease conditions develop, providing a scientific basis for understanding the therapeutic management and nursing care of an illness. · Want to Know boxes guide the student in teaching the parents and child about self-care in the home and follow-up care in community-based health care settings. · Each chapter opens with Learning Objectives and Definitions and closes with Key Concepts to assist students in focusing their study on important topics and key terms to be gleaned from each chapter. · Photo Stories provide a visual description of the nursing role in a variety of settings. · Communication Cues offer students tips and practical examples of communicating with children of all ages as well as with their parents. · Procedure boxes highlight step-by-step instructions for common nursing tasks to assist students in their clinical practice. · The Resources for Health Care Providers and Families appendix, organized by topic, identify organizations that provide condition-specific information and support to the health care professional or to parents and children in the community · Reorganized table of contents condenses and combines material into more logical, streamlined approach, making the textbook more useful to shorter or combined maternity/pediatric courses. · Health Promotion Boxes outline American Academy of Pediatrics (AAP) recommended well-child visits and include growth and development milestones, health screening and immunizations, and anticipatory guidance. · Pediatric health priorities, as identified by the U.S. Department of Health and Human Services, are highlighted in Healthy People 2010 boxes to assist the student in formulating pediatric health promotion goals. · Critical to Remember boxes alert the student to important information needed to deliver safe nursing care. · Critical Thinking Exercises present students with issues and problems in clinical scenarios that challenge the student to apply learning to practice. Suggested answers and rationales appear at the end of the chapter. · Special Nursing Care Plans guide the student in planning care in the home or community-based health care setting. · Drug Guides highlight common medications and provide students with a quick reference on nursing implications.
