Supply Chain Management A Global
In commerce, global supply-chain management is defined as the distribution of goods and services throughout a trans-national companies' global network to maximize profit and minimize waste. Essentially, global supply chain-management is the same as supply-chain management, but it focuses on companies and organizations that are trans-national. Global supply-chain management has six main areas ...

Global supply chain management - Wikipedia
A global supply chain utilises low-cost country sourcing and refers to the procurement of products and services from countries with lower labour rates and reduced production costs than that of the home country. A global supply chain will usually flow from your own organisation in your home country as a buyer across your supplier tiers; it is these suppliers who will be located in other areas of the globe.

Global Supply Chains | CIPS
In Supply Chain Management 1e, Nada Sanders presents material from a uniquely balanced, integrative, and business-oriented viewpoint. Examining supply chain management as a boundary-spanning function that is intertwined with other organizational areas, the text provides future supply chain managers instruction on interactions and integration of multiple business units.
