This book is a  
pioneering attempt to  
understand the  
prehistory of  
Hinduism in South  
Asia. Exploring

religious processes in the Deccan region between the eleventh and the nineteenth century with class relations as its point of focus, it throws new light on the making of religious communities, monastic institutions, legends, lineages, and the ethics that governed them. In the

light of this prehistory, a compelling framework is suggested for a revision of existing perspectives on the making of Hinduism in the nineteenth and the twentieth century.

This book is the

is one of the most

much so that it is not  
even included in the

modeling suggests  
that it kills more

An examination of the philosophical notion of sacrifice from Kant to Nietzsche. In this book, Paolo Diego Bubbio offers an alternative to standard philosophical accounts of the

# Access Free Sym Sanyang

notion of sacrifice,  
which generally begin  
with the hermeneutic  
and postmodern  
traditions of the  
twentieth century,  
starting instead with  
the post-Kantian  
tradition of the  
nineteenth century.  
He restructures the  
historical  
development of the  
concept of sacrifice

# Access Free Sym Sanyang

through a study of  
Kant, Solger, Hegel,  
Kierkegaard, and  
Nietzsche, and shows  
how each is indebted  
to Kant and has more  
in common with him  
than is generally  
acknowledged.

Bubbio argues that  
although Kant sought  
to free philosophical  
thought from  
religious foundations,

# Access Free Sym Sanyang

he did not thereby  
render the role of  
religious claims  
philosophically  
useless. This makes it  
possible to consider  
sacrifice as a  
regulative and  
symbolic notion, and  
leads to an  
unorthodox idea of  
sacrifice: not the  
destruction of  
something for the

# Access Free Sym Sanyang

sake of something  
else, but rather a  
kenotic emptying,  
conceived as a  
withdrawal or a  
“ making room ” for  
others.

This volume presents  
a diverse collection of  
methodologies used  
to study various  
problems at the  
protein sequence and

structure level. The chapters in this book look at issues ranging from broad concepts like protein space to specifics like antibody modeling. Topics include point mutations, gene duplication, de novo emergence of new genes, pairwise correlated mutations, ancestral protein

answers the question,  
“ What is
