I finished Robert Wright's "The Moral Animal: Why We Are The Way We Are" yesterday, a look into the human mind through the perspective of evolutionary psychology. Wright is a deterministic Darwinist and firmly believes that the concept of free-will unfettered by the bounds of our species' evolutionary

Why do parents favor some children over others? What evolutionary advantages might come from having low self-esteem? What are the biological roots of self-deception? These are among the questions that have made The Moral Animal one of the most provocative science books in recent years, as well as one of the most genuinely important.

THE MORAL ANIMAL examines the significance of this extraordinary shift in our perception of morality and what it means to be human. Taking the life of Charles Darwin as his context, Robert Wright brilliantly demonstrates how Darwin's ideas have stood the test of time, drawing startling conclusions about the structure of some of our most basic preoccupations.

This is a profoundly insightful book that explores the inner evolutionary workings of the human being in regard to what we term moral behavior, particularly in the sexual realm, as Wright sees the reproductive urges and needs of the male and female animal as being perhaps the greatest inner (and thus often highly subconscious) motivators of almost all "moral/immoral" behavior and views them as the very source of the need for moral systems to start with.
